

School Improvement Plan (SIP) Columbia Virtual Academy 2022-2023

Our Vision: Preparing ALL students for THEIR future

Our Mission: Personalized Competency-Based Learning for EVERY student

CVA's SIP is designed to address VSD's Roadmap to the Vision. CVA staff understand its current learning system and learning is personalized in many ways. However, we are not using proficiency scales to identify where students are within *essential learning targets*. We currently measure student progress based on broad grade-level standards, such as overall reading levels, and based on course/curriculum progress and completion. When we know where students are according to essential learning targets, we can focus efforts and resources on helping students take ownership of their learning, improving personalization, finding joy in learning, and developing lifelong learning habits.

Goal: Using the established proficiency scales, 100% of grades K-2 families and teachers, will know the level of their student's competency according to the essential learning targets (critical concepts) in language arts and math and will have a personalized plan by the end of the 2024-2025 school year.

⇒ By 2025-2026 grades 3-5 students

⇒ By 2026-2027 grades 6-8 students
